DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1–15, drawn to a process of making a meat product comprising culturing muscle, somite or stem cells.

Group II, claims 16–23, drawn to a meat product comprising *in vitro* produced animal cells in a three dimensional form.

An international or national stage application containing claims to different categories of invention will be considered to have unity of invention if the claims are drawn only to one of the of following combinations of categories;

(1) a product and a process specially adapted for the manufacture of said product; or

(2) a product and a process of use of said product; or

(3) a product, a process specially adapted for the manufacture of the said product, and a use of the said product; or

(4) a process and a apparatus specifically designed for carrying out said process; or

(5) a product, a process specially adapted for the manufacture of the said product and an apparatus specifically designed for carrying out said process.
37 CFR 1.475.

The groups of invention fall within category (1), a product and a method

Art Unit: 1651

of making of that product, and thus may be considered to have unity of invention under this requirement.

However, upon further analysis, the inventions listed as Groups I and II do not relate to a single general inventive concept because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The product AS CLAIMED is known in the art. See Chromiak *et al.* [U] where a three-dimensional, animal skeletal-muscle cell culture product is disclosed. Thus, no special technical feature links the two groups of claims even though they fall within one category.

The expression "special technical feature" shall mean those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art (PCT Rule 13.2, MPEP 1850). Thus, a feature found in the prior art cannot be considered to be a special technical feature.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).
